
Welding

There are special requirements and conditions that must be met prior to performing any welding on the coach.

Contact Customer Service for assistance.

WARNING

Risk of fire.

Welding on any part, section or piece of equipment attached to the coach can cause severe equipment damage and possible fire.

Contact Customer Service for assistance.

Battery Equalizing Charge

Overview

The Life Line Batteries require periodic equalization. This procedure should be done by a Featherlite Service Center.

Contact Customer Service for assistance.

CAUTION

Risk of battery damage.

Performing an equalizer battery charge requires high voltages of over 30 volts DC.

Battery damage can result.
